LESA AD 2.20 LOCAL AERODROME REGULATIONS**20.1 CIVIL AIRCRAFT**

Civil aircraft not based at Salamanca AD:

- May be cleared to carry out practices of approaches, landing and take-off on Saturdays, Sundays and holidays prior request at least 72 hours in advance. Other days they will not be cleared.
- May experience delays due to schools flight activity, except for public passenger transport commercial flights.
- May operate outside operational hours, prior coordination, at least 60 minutes in advance, when performing domestic ambulance and/or organ transport flights.
- Operations outside HR CIV AD, except for public passenger transport commercial flights, must be requested from the operations office via e-mail to osalamanca@aena.es, at least 72 hours before the operation. The request must contain the following information:
 - Flight number and aircraft operator.
 - Flight type.
 - Type of aircraft and registration.
 - Date and time planned (arrival and/or departure).
 - Origin and/or destination.
 - Passenger manifest.
- Authorization for the operation will be issued by the same means by which it was requested.
- VFR flights may not be accomplished from Mondays to Fridays, other than public holidays, except for regular commercial flights.
- School flights will not be cleared from Mondays to Fridays (except public holidays).

20.2 CREW STAY IN CIVIL AIRCRAFT

Except in cases of force majeure, crew may stay in the aircraft up to one hour after landing, and may not accede to it until two hours before estimated time of departure.

20.3 FOREIGN STATE/MILITARY AIRCRAFT

PPR request is mandatory at least 72 hours in advance. When transporting dangerous goods or special operational needs this will be requested at least three working days in advance.

20.4 STATE SECURITY FORCES AIRCRAFT, MILITARY AND OTHER STATE AIRCRAFT

State Security Forces, Military and other state aircraft may operate outside operational hours, prior coordination, sending the request via FAX MIL at least 60 minutes in advance. In the request they must indicate: parent unit, number of aircraft, plans, schedule and POC.

20.5 PROCEDURE FOR THE REQUEST OF FIRE CATEGORY ON DEMAND

Salamanca Airport provides civil category 5 SEI continuously and 6 and 7 on demand. To operate with category 6 or 7 companies must request this from the operations office via e-mail to osalamanca@aena.es, at least 72 hours before the operation. The request must contain the following information:

- Flight number and aircraft operator.
- Flight type.
- Type of aircraft and registration.

- Date and time planned (arrival and/or departure).
- Origin and/or destination.
- Passengers manifest.

Confirmation of category 6 or 7 will be issued by the same means by which it was requested.

20.6 ENGINE TESTS

The engine tests for aircraft located on the civil apron, shall be carried out at the RWY 03 runway holding position or at RWY 21 runway holding position. The testing request shall be made to TWR, who shall determine at which of these points it must take place.

20.7 OPERATIONAL SAFETY REPORTS

Pilots/operator shall report to the airport as soon as possible about any accidents, incidents, occurrences or events which may have a potential operational impact and in which they have been involved or witnessed.

The aim of these reports is the compilation of the information in order to improve operational safety, independently of the compulsory report of the occurrence to the appropriate aeronautical authority. Data may be sent in any format, including at least the following information:

- Date and time.
- Site.
- Parties involved (data used to identify vehicles, aircraft...involved).
- Companies implicated.
- Description of the facts.
- Any other data considered relevant (e.g. lighting conditions, weather, phase of the operation such as take-off / landing / stopover, pavement conditions...).

Contact e-mail address of the airport, for the reception of operational safety reports, is the following: seguridad_operacional_slm@aena.es

In addition to notifying the airport by means of the indicated system, it is necessary to send at least basic data of the accident, incident, occurrence or event to the air traffic control service provider (ATC).

20.8 ARMS AND EXPLOSIVES INSPECTION SERVICE

For those passengers who are carrying arms and so that the control services necessary can be established, a request must be made at least 72 hours in advance, to osalamanca@aena.es

LESA AD 2.21 NOISE ABATEMENT PROCEDURES

No.

LESA AD 2.22 FLIGHT PROCEDURES

22.1 LOW VISIBILITY PROCEDURES (LVP)

Low Visibility Procedures (LVP) are not available at Salamanca airport.

22.2 AD TRAFFIC CIRCUIT

(1) Aircraft joining the communications failure circuit shall do so around the control tower, clockwise, maintaining appropriate safety distance from the runway and the main taxiway, and paying special attention to other aircraft which may be established in the visual circuits or making use of the runway.

LESA AD 2.23 ADDITIONAL INFORMATION**23.1 ARRESTING SYSTEMS**

Nomenclature: LESA-01-R-U.

Type: NET BARRIER UNIDIRECTIONAL.

Location on RWY: RWY 21 THR + 2430 m / 7972 ft.

Readiness status: Permanently available on pilot request.

23.2 BIRD CONCENTRATION AREAS AND BIRD MOVEMENT IN THE VICINITY OF THE AD

The following bird concentration and passage areas can be identified near the airport compound:

23.2.1 CONCENTRATION AREAS

Zone 1: concentration of pigeons.

Zone 2: concentration of starlings and lapwings (December-March).

Zone 3: concentration of crows.

Zone 4: concentration of common house martins (July-August).

23.2.2 FEEDING AREAS

Zone I: Crops areas.

23.2.3 BIRD MOVEMENT

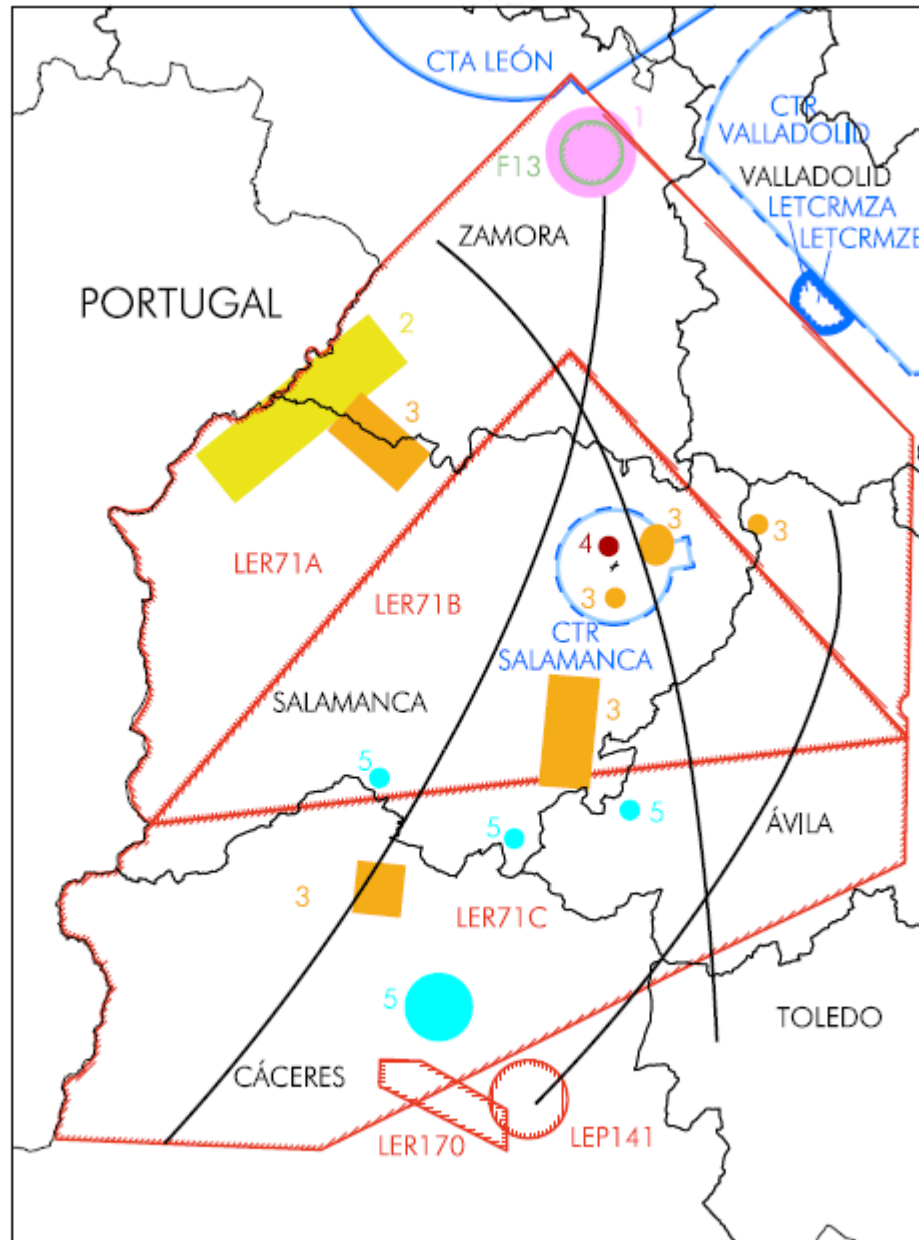

Movement A: pigeons in flight.

Movement B: starlings and lapwings in flight.

Movement C: crows in flight.

Movement D: common house in flight.

23.3 POTENTIAL BIRD HAZARD AREAS

— Rutas migratorias, en invierno hacia el sur, en primavera/verano hacia el norte.
Migratory routes, to the south in Winter, to the north in Spring/Summer.

1. Natural reserve: SFC-1000 ft AGL.
 - o Bustard (+6 kg)
 - o Goose (4 kg)
 - o Medium-sized raptors (1.5 kg)
2. At sunrise and sunset below 1000 ft AGL; rest of the day above 1000 ft AGL.
 - o Black stork (+3 kg)
 - o Black griffon vulture (+10 kg)
3. They can fly at heights above 1000 ft although they are usually at low altitudes.
 - o Crane (+6 kg)
 - o Gray heron (+2 kg)
 - o Cormorant (+3 kg)
 - o Ash Gull (+1 kg)
 - o Bustard (+6 kg)
4. At mid and high altitudes all day.
 - o Stork (+3 kg)
 - o Griffon vulture (+8 kg)
 - o Black vulture (+10 kg)

- Seagull (+1 kg)
 - Red kite (+1.5 kg)
5. Heights above 1000 ft AGL.
- Black stork (+4 kg)
 - Griffon vulture (+8 kg)
 - Black vulture (+10 kg)
 - Red kite (+1.5 kg)

LESA AD 2.24 AERONAUTICAL CHARTS RELATED TO AN AERODROME

The list of charts related to the aerodrome can be found on the link below:
