GREEN SLOT: VFR operations without additional restrictions up to the declared maximum capacity, subject to known data of commercial scheduled flights operating on a weekly repetitive basis. As during the winter season, airspace saturation may occur even within a "green" time window.

YELLOW SLOT: VFR operations restricted. Touch and go operations may be denied and arrival and departure flows limited (approximately 5 to 7 per hour), depending on the number of instrument operations in accordance with the declared capacity and ATC discretion. The "first come, first served" principle shall apply. Emergency flights and aerial work operations are also VFR movements and shall be prioritised.

RED SLOT: VFR and training / school operations denied. In order to avoid flight plan cancellations or very long delays, operators are advised not to plan operations during red slots. Instrument training flight plans shall also be affected.
